PROFESSIONAL SUMMARY

Hello there. I am full-stack Software Engineer with 6+ years of experience building enterprise software, AI products, cloud infrastructure, and distributed systems. Experienced across product architecture, backend engineering, RAG systems, Kubernetes, and developer tooling, with a strong focus on shipping scalable products from idea to production.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL
Frontend: React, Next.js, Angular, Tailwind CSS
Backend: FastAPI, Django Rest Framework, Node.js, PostgreSQL, SQLAlchemy
Cloud: Docker, Kubernetes, AWS, Azure, Terraform, Kafka, ArgoCD
AI: RAG, Agentic AI, Databricks, Google OR-Tools

EXPERIENCE

- Lead Software Engineer** *Dec 2024 – Mar 2026*
AB InBev via Toptal – RAG, Azure AKS, Databricks, FastAPI, React
- Built and shipped **Insights Copilot**, an enterprise AI assistant integrating FastAPI, React, Azure AKS, Databricks, RAG, and agentic workflows for internal business analytics.
 - Designed scalable AI infrastructure with KEDA autoscaling, Redis-backed services, and AI-generated Plotly visualizations for enterprise reporting.
- Software Engineer** *Sept 2022 – Sep 2024*
Frazil – IoT, Kafka, AWS, FastAPI, ArgoCD
- Built cloud-native backend systems ingesting telemetry from thousands of IoT vending machines, processing over **100K+ events per minute**.
 - Developed Kafka pipelines, Kubernetes deployments, analytics dashboards, and eCommerce platform features powering business operations.
- Fullstack Engineer** *Aug 2018 – Jul 2022*
KPS Software – Angular, Java, OR-Tools, Healthcare

PRODUCTS SHIPPED

- Lead Product Engineer** *Shipped 2026*
SettleQ <https://settleq.com>
- Designed and built invoice recovery platform integrating Stripe Connect, Temporal workflows, FastAPI, and React from concept to production.
 - Modeled and wrote temporal workflows for durable invoice recovery workflows, so each invoice could move through timed recovery stages reliably without fragile cron logic.
- Lead Product Engineer** *Shipped 2024*
Scholars' PTE <https://scholarspte.com>
- Customized a Whisper-based speech recognition pipeline and configured Celery asynchronous task queues, reducing user evaluation feedback wait times from 5 minutes down to 15 seconds.
 - Mentored a team of three junior developers while owning end-to-end full-stack architecture across Next.js, FastAPI, PostgreSQL, and Supabase security configurations.

PERSONAL PROJECTS

- Docklite:** Docklite is a local-first VS Code extension for inspecting and managing Docker containers, images, and volumes without leaving the editor. [View in Marketplace](#) 📄
- Mocklane:** Mocklane turns a pasted data model and a plain-language request into a structured JSON HTTP response. Its CLI opens the browser workspace, serves generated mocks from a local API, and can proxy every unmatched request to an existing backend. [View in NPM](#) 📄

EDUCATION

Constructor University	<i>2018 – 2021</i>
<i>B.Sc. Mathematics, Disc.</i>	<i>Bremen, Germany</i>
Kathmandu Model HSS	<i>Graduated 2018</i>
<i>High School</i>	<i>Kathmandu, Nepal</i>
